Summary

I'm a Front-End Developer living in Gujrat, India. I am studying at CVM University, Faculty of IT. Since the beginning of my journey with Front-End Developer I have become addicted to developing responsive websites. I spend more than 6 hours in front of a computer screen every day. I am using Visual Studio Code to write code with HTML5, CSS3 and JavaScript. I love coding things from scratch, but I can work with front-end frameworks like Bootstrap too.

Skills

- HTML5
- CSS3
- JavaScript
- Bootstrap
- Git & GitHub
